Great cinema

Dear Arijan, without a doubt you have shown the world how F5J flying can be pushed to the limit. 6 perfect flights with 1000 points in the preliminary rounds with flight times of 2x 9:59 and 4x 9:58, 6x 50 landing points and take-off heights of 8m, 3m, 11m, 36 m, 41 m and 5m. That is an average take-off height of just 17 m. And that already includes the 1000-point drop flight. Without the drop flight it would only be 12.6 m average take-off height... It doesn't get any better than that. And then you showed in the fly-off that, contrary to all the rumours, you also have human nerves. But maybe you just want to fly spectacularly for the sake of fun ? Maybe without that, a win might not be valuable enough for you. Whatever. Congratulations on the successful flight with the lowest takeoff altitude ever seen at a FAI World Cup.

### Video of 3m launch...

Many thanks to Peter Zweers for sharing the video with us.  
At the end of the video, Peter says that he believes this launch was even lower than the 8 m launch in the previous flight.

## A few links about further information about the competition

Note: These links were working at the time of writing. These links are "not" updated. So they may no longer be available in the future:

Because it is the preliminary competition for the European Championship, there will be many reports on many social media. Below, therefore, there is only one link to the different news groups. If you access the links below at a later time than the competition date, please scroll down to August 23 and 24, 2024 to find the relevant information. So here is just a selection. I hope that's OK?
